

Press Release

Nebulas Solutions Group Partners with LogRhythm for Early Success

London, 6 May 2009 - Nebulas Solutions Group's new partnership with LogRhythm, the company that makes log data useful, has already resulted in three significant new customer wins – two in the financial services industry and one in the public sector – within the first three weeks of the agreement being signed.

Under the terms of the partnership, Nebulas Solutions will offer LogRhythm's enterprise solution which integrates log and event management, file integrity monitoring and end point monitoring and control. The solution automates the collection, organisation, analysis, archiving and reporting of all log data, enabling users to meet their compliance, security or operational requirements more easily. It also gives customers timely and actionable insights into security, availability, performance and audit issues within their IT infrastructure.

The partnership further strengthens Nebulas Solutions' compliance and auditing capabilities which help customers in many different industries meet their industry specific compliance obligations. As a specialist in solutions for PCI (Payment Card Industry) Data Security Standards, Nebulas Solutions' addition of the LogRhythm solution will help customers to improve their compliance, overall security and gain better operational visibility and insight.

Commenting on the agreement, Nick Garlick, managing director at Nebulas Solutions said: "We're always looking to partner with leading technology companies and LogRhythm's solution will enhance our broad-ranging compliance offering. I'm delighted that our partnership has already generated three customer wins; it clearly shows the appeal of our combined offering. Given such early success, I'm looking forward to developing a significant, long-term relationship with LogRhythm".

LogRhythm's vice president and managing director EMEA, Ross Brewer is confident that the relationship with Nebulas Solutions will bring dividends. He commented: "We're looking forward to working with Nebulas and will benefit significantly from the Group's broad business base of customers, particularly within the financial services market. Our early wins have highlighted the partnership's potential and created terrific momentum for moving forward. By widening our joint offering to Nebulas' customers in broader industry sectors, I'm confident that both organisations will enjoy strong revenue growth over the coming year".
